# Learning to Live Together

## An Intercultural and Interfaith Programme for Ethics Education

A set of tools for facilitators and educators

[www.ethicseducationforchildren.org](http://www.ethicseducationforchildren.org)

The *Learning to Live Together* manual is an educational tool promoting intercultural and inter-religious learning. It can be used with children and young people above 12 years in different settings: workshops, conferences, seminars, schools or youth camps.

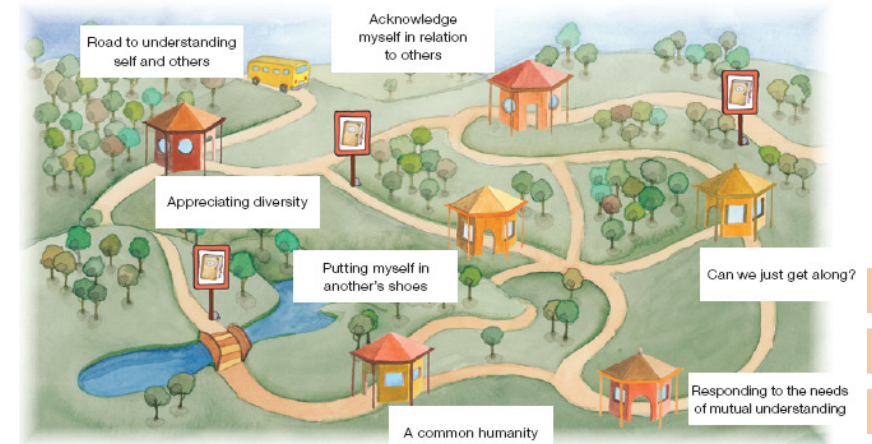

*Learning to Live Together* contributes to the realisation of the right of children to their full development and education. It allows children from all over the world to share and learn with people of other cultures and beliefs, helping them relate to others without stereotypes and enabling them to be peace builders.

### *Learning to Live Together ...*

- Focuses on four ethical values, **respect**, **empathy**, **reconciliation**, and **responsibility**.
- Includes two learning modules — **Understanding Self and Others** and **Transforming the World Together** — throughout which the ethical values are integrated.

## Module 1: Understanding Self and Others

## Module 2: Transforming the World Together
